

# ***A HOUSE FULL OF JENNIES!***

*Along the Medina River, Kelly Field, TX, 1917 by Randy Green*

## **THE JENNIES HAVE SHIPPED!**

**Curtiss Jenny • 1/48 scale • 05119**

### **ONE OF AURORA'S RAREST AIRPLANE KITS!**

This Classic Jenny kit has not seen the light of day since the early 1960s.  
It was never reissued after its initial run.

We've had this tool for some time now. It came to us rusted and pitted. Over the years, we have stoned, polished, sometimes welded, and inscribed surface detail to get it just right. But it is worth it. It is a wonderful kit to build with excellent fit and detail.

One of the nicer things Aurora always did with its airplane kits was to include an attractive base and accessory figures. This kit comes with a pilot, two ground crew, plus an attractive base.  
What a great diorama can be made from this.

### **SEVEN DECAL OPTIONS!**

All that aside – wait till you see the artwork and decal options.  
The classic USAAC at Kelly Field, TX, is probably the most popular (and adorns the cover art) plus another USAAC and U.S. Marine.  
We didn't stop there. We researched the Jenny and with the help of several aviation historians, we discovered 4 incredible and gorgeous Argentine markings.  
The colorful Argentine option in our Grumman Duck has always been popular.

"The decals were great. The decals that you include in your kits are the best there are. The colors are in perfect alignment. They do not silver on a gloss surface. They slide off the backing and into position easily." Joe in South Carolina

*If your wholesaler does not carry the Glencoe Models Jenny,  
lets us know and we will tell you who does.*
