

FOLLOWING THE CURTISS JENNY WILL BE THE...

BARNSTORMING JENNY (05126)

The amazing and eye-catching livery for two of Earl Daugherty's famous Jennies will sell this kit. Plus, two options for Lilian Boyer, one of the most famous woman barnstormers, are included. There is a restored Jenny of his still flying at the Golden Age Air Museum.

After WWI, there were hundreds of pilots and surplus Jennies so the Jenny became the main steed for these new heroes. They flew all over the country to fairs and small towns. This was the first time most Americans had ever seen an airplane. They were the rock stars of the 1920s. The barnstormers were amazing men AND women. Many of them became leaders in aviation in the Americas from Charles Lindberg to the founders of most of our airline companies still flying today. Artwork is done and decals are ordered!
